

Exercise 6

AIM :

To create a C program for the below requirements without using string.h header

1. copy one string to another string
2. Compare two strings
3. reverse a string and store it
4. Remove all space in a string and store it

ALGORITHM :

Step 1: START

Step 2: Declare function prototypes for all string operations

Step 3: Display main menu with 4 options

Step 4: Read user choice (1-4)

Step 5: Based on choice, execute corresponding case:

Case 1: STRING COPY

Step 5.1: Read source string from user

Step 5.2: Remove newline character from input

Step 5.3: Call str_copy() function

Step 5.4: Display original and copied strings

Case 2: STRING COMPARE

Step 5.1: Read first string from user

Step 5.2: Read second string from user

Step 5.3: Remove newline characters from both

Step 5.4: Call str_compare() function

Step 5.5: Display comparison result

Case 3: STRING REVERSE

Step 5.1: Read string from user

Step 5.2: Remove newline character

Step 5.3: Copy original string to preserve it

Step 5.4: Call str_reverse() on copy

Step 5.5: Display original and reversed strings

Case 4: REMOVE SPACES

Step 5.1: Read string from user

Step 5.2: Remove newline character

Step 5.3: Copy original string to preserve it

Step 5.4: Call remove_space() on copy

Step 5.5: Display original and space-free strings

Default: Display "Invalid choice"

Step 6: END

OUTPUT :

```
PS D:\C programming\DHAVAMANI_EX6> .\str.exe
STRING OPERATIONS PROGRAM
1. Copy string
2. Compare strings
3. Reverse string
4. Remove spaces
Enter choice: 1
Enter string: dhava
Original: dhava
Copied: dhava
PS D:\C programming\DHAVAMANI_EX6> .\str.exe
STRING OPERATIONS PROGRAM
1. Copy string
2. Compare strings
3. Reverse string
4. Remove spaces
Enter choice: 2
Enter string 1: dhava
Enter string 2: dhavamani
Compare result: First is smaller
```

```
PS D:\C programming\DHAVAMANI_EX6> .\str.exe
STRING OPERATIONS PROGRAM
1. Copy string
2. Compare strings
3. Reverse string
4. Remove spaces
Enter choice: 3
Enter string: dhava
Original: dhava
Reversed: avahd
PS D:\C programming\DHAVAMANI_EX6> .\str.exe
STRING OPERATIONS PROGRAM
1. Copy string
2. Compare strings
3. Reverse string
4. Remove spaces
Enter choice: 4
Enter string: this is dhava from ami
Original: this is dhava from ami
No spaces: thisisdhavafromami
```
